Jaen Approximation Project

The Jaen Approximation Project aims to contribute to the development in approximation theory by encouraging the exchange of ideas through the interaction among researchers in the area, becoming Jaén a meeting-point in approximation theory. The Jaen Approximation Project seeks quality and wishes that the participants feel part of the project.

The Jaen Journal on Approximation is part of the Jaen Approximation Project. The Jaen Approximation Project would like to express its sincerest gratitude to so many outstanding researchers that contribute as editors, authors and referees in the Jaen Journal on Approximation.

Also it would like to express its gratitude to all the different people and institutions that have supported the project, specially the Diputación Provincial de Jaén. Thanks to them, in the first years we have focused on making the journal better known, sending thousands of copies to researchers all over the world in what may be an unprecedented effort.

Thanks to researchers and supporters the Jaen Journal on Approximation is now well known and it is able to invite to contribute to all researchers on approximation theory and its applications in their broadest sense.

Authors and referees will get discounts in the activities of the Jaen Approximation Project and they will be granted with online access (IP address) during a year to the Jaen Journal on Approximation.

Also Institutions will be granted with online access (institutional IP range) during a year to the journal when a member publishes a paper in the Jaen Journal on Approximation.

In this way, Institutions with a good group of researchers in approximation will obtain indefinite free access to the Jaen Journal on Approximation if they submit a good paper a year.

If authors are committed with their institutions to include their papers in eventual institutional repositories, then the Jaen Journal on Approximation will provide copies with this purpose.

Members of subscriber institutions of the Jaen Journal on Approximation will get special discounts in the activities of the Jaen Approximation Project.

In the next years, we will need the help of universities and research centers. We think that if many institutions subscribe, we will be able to offer a quality journal at a reduced price, and be able to support the researchers (editors, authors and referees), the true creators of any publications.

In our web page, researchers will be able to obtain information about the number of received, printed, in press or in referee process papers. It also includes the number of pages, in such a way that authors will be able to estimate when their papers could be printed if they were accepted. In this moment the average time from reception to publication is smaller than one year.

VI Jaen Conference on Approximation

Úbeda, Spain, June 28th-July 3rd, 2015

In addition to the journal, an international meeting, known for short as Ubeda Meeting, was organized annually since 2000 till 2009. The participation in the Ubeda Meeting was by invitation and limited to 30/40 people, making it as fruitful as possible. During 4/5 days, participants could attend around 30 lectures, exchange ideas, taste different and nice foods, visit singular places as Castles, renaissance Palaces and World Heritage Sites, enjoy Flamenco shows, etc. Discussions during meals, walks, and visits provided opportunities to exchange ideas.

After ten editions of the Ubeda Meeting, in 2010 a new activity was launched: The Jaen Conference on Approximation, Computer Aided geometric Design, Numerical Methods and Applications. There the participation is, not only by invitation, more on the contrary all researchers in approximation theory in its broadest sense are welcome.

The sixth edition of the Jaen Conference on Approximation will be hold, as usual, in Úbeda, a World Heritage Site, in the period June 28th- July 3rd, 2015.

The objective of these conferences is to provide a useful and nice forum for researchers in the subjects to meet and discuss. In this sense, the conference programs have been designed to keep joined the group during four/five days with a program full of scientific and social activities.

The Conference will be devoted to some significant aspects on Approximation Theory, Computer Aided Geometric Design, Numerical Methods and the Applications of these fields in other areas.

The participants are expected to arrive on June 28th, 2015 and to leave on July 3rd, 2015. The opening ceremony will take place on June 29th and the closing ceremony will take place on July 2nd.

The Conference will feature six/eight invited speakers who will give 50 minutes plenary talks. We invite you to contribute a talk or a poster. In this edition, we also provide the possibility to attending on-line and contributing a poster.

Finally, but also important, the Conference provides you the possibility to visit World Heritage Sites and taste a wide culinary variety. According to previous experiences, accompanying people will enjoy the Conference.
